

TO THE CHAIRMAN AND MEMBERS OF THE

URBAN DISTRICT COUNCIL OF SKEGNESS.

MR. CHAIRMAN AND GENTLEMEN,

I beg to submit to you my Annual Report for the year 1898, also some Tables supplied by the Local Government Board. Table A deals with the mortality of the District. Table B only deals with cases of sickness which is not altogether reliable, due to the difficulty in getting reliable information.

On examining the table of mortality it will be seen we have had one case of Scarlet Fever, which was imported from Nottingham when the Robin Hood Rifles were down, and I do ask the Council to have a Hospital and Mortuary as it is necessary for the town. During the year the supply of water has been good. The number of deaths registered were 39, but 20 of these were Visitors residing here for a short time. The number of births registered was 37.

I consider the health of the Town to be excellent and I beg to submit the Inspector's Report. I have made a House to House Inspection and find the Sanitary arrangements in perfect order.

C. J. BERNARD,

MEDICAL OFFICER OF HEALTH.

February 11th, 1899.
